Assistant, Associate or Professor (MCL or UTL)
Department of Medicine, Clinical Excellence Research Center (CERC), Stanford University, School of Medicine

The Clinical Excellence Research Center (CERC) in the Department of Medicine at Stanford University seeks research faculty to join the Center as Assistant Professor or Associate Professor or Professor in the University Tenure Line (UTL) or the Medical Center line (MCL). We are seeking dynamic individuals to bring intellectual leadership and rigorous scholarship within the Center's research focus.

The Center's focus is the discovery of scalable methods of high-quality healthcare delivery that lower population-wide health spending. Please visit CERC’s website for further background. Priority will be given to candidates who use innovative analytic approaches to discover how information technology tools enable higher-value care at scale via applications such as decision support, workflow support, information exchange, and emerging forms of artificial intelligence. While the impact of policies that aid or impair the value of such tools is within the Center's research focus, actual development of clinical decision support tools or IT infrastructure is not.

We seek faculty doing cutting-edge research across nationally representative healthcare systems, populations, and payers. Candidates should have an MD or PhD degree and a distinguished record relative to their career stage: (a) scholarly achievement, (b) policy influence (c) research funding from diverse sources and (d) effective teaching.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, and scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. Faculty rank will be determined by the qualifications and experience of the successful candidate. Faculty will be appointed to the Stanford Division, Department and School best matched to their research focus and credentials.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women and members of minority groups, as well as others who would bring additional dimensions to the university's research, teaching and clinical missions.

Interested candidates should submit their curriculum vitae, the names of three references, and a not to-exceed-one paragraph description of up to three examples of success in each of the four categories (a), (b), (c) and (d) listed above to: http://facultyapplication.stanford.edu/

Please note that your references will not be contacted until we have your consent.
