

**Assistant or Associate Professor (MCL or UTL)
Department of Medicine, Division of Primary Care and Population Health,
Stanford University, School of Medicine**

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women and members of minority groups, as well as others who would bring additional dimensions to the university's research, teaching and clinical missions.

The Department of Medicine at Stanford University, Division of Primary Care and Population Health, as well as its component Sections of Palliative Care and Geriatrics seek health services investigators to join the Department at the Assistant Professor or Associate Professor level in the University Tenure Line (UTL) or Medical Center Line (MCL). Applicants are required to have either an MD, PhD, or an equivalent degree. We are seeking dynamic, creative individuals to bring intellectual leadership and rigorous scholarship to our existing health services research activities. Successful and qualified researchers will exhibit accomplishment in research relevant to the care of older adults and their caregivers living with the consequences of advanced illness including bereavement. They will also be expected to contribute to our mission through education and teaching including training and mentoring of post-doctoral fellows and other trainees in graduate programs associated with the Stanford University School of Medicine.

The research activities of the Division of Primary Care and Population Health are diverse. Current areas include health policy, quality of care, delivery system innovation, pain and symptoms measurement and management, goals of care communication, global health, appropriate use of medications, health informatics and other applications of technology and bioinformatics, implementation science, health economics, ethnogeriatrics, supportive oncology, and biomedical ethics.

The predominant criteria for appointment in the University Tenure Line is a major commitment to research and teaching. The major criteria for appointment in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fill. Faculty rank and line will be determined by the qualifications and experience of the successful candidate.

The successful candidate should be either a physician or doctoral level researcher with or without other clinical qualifications. Clinicians should have a board certification or be board eligible in internal medicine, family practice, or a related subspecialty (e.g., palliative medicine, geriatrics) and successful applicants will have a growing track record of publication and funding commensurate with experience.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women, members of minority groups, protected Veterans, and individuals with disabilities, as well as from others who would bring additional dimensions to the University's research, teaching, and clinical missions. Interested candidates should submit a curriculum vitae and a brief letter outlining their interests along with the names of three references here: <http://facultyapplication.stanford.edu/>

Please note that your references will not be contacted until we have your consent.
