

**Assistant, Associate or Full Professor  
Center for Primary Care and Outcomes Research, Department of  
Medicine  
Stanford University School of Medicine**

*Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women and members of minority groups, as well as others who would bring additional dimensions to the university's research, teaching and clinical missions.*

The Center for Primary Care and Outcomes Research (PCOR) and Center for Health Policy (CHP) at Stanford University (<http://healthpolicy.fsi.stanford.edu>), in conjunction with the Department of Medicine, seeks an assistant, associate, or full professor in the University Tenure Line with expertise in medical decision sciences and cost-effectiveness analysis, including modeling of disease.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching.

PCOR/CHP is an interdisciplinary group that works with multiple departments and schools throughout the university. We are seeking individuals with demonstrated interest and expertise in medical decision sciences, or closely related areas such as cost-effectiveness analysis, cost-benefit analysis or disease modeling. An interest in evaluating health interventions both in international and domestic settings is desirable. Applicants should have a Ph.D. degree or an M.D. with Ph.D.-level expertise. The Ph.D., or Ph.D.-level expertise, should be in a discipline related to medical decision sciences, such as medical decision analysis, management science, operations research, economics, statistics or biomedical informatics. The successful candidate is expected to develop an independent research program in health-related decision sciences and to participate in the School of Medicine's training and teaching programs in health policy.

PCOR/CHP is an interdisciplinary group with a broad research program in health policy, both domestically and internationally. The successful candidate may participate in any of research activities of PCOR/CHP but is expected to focus on the decision sciences. Further information about PCOR and CHP can be found at <http://healthpolicy.fsi.stanford.edu>.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women, members of minority groups, protected veterans and individuals with disabilities, as well as from others who would bring additional dimensions to the university's research, teaching and clinical missions.

To be considered for this position, please send a letter addressed to Dr. David Studdert, Search Committee Chair, describing your interest, your curriculum vitae, and the names and addresses of three references to <http://facultyapplication.stanford.edu/>.
