

Assistant, Associate or Full Professor in the Department of Medicine
Stanford University
Stanford Prevention Research Center (SPRC)
In Community-based research

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women and members of minority groups, as well as others who would bring additional dimensions to the university's research, teaching and clinical missions.

The Stanford Prevention Research Center, an interdisciplinary research division in the Department of Medicine, is seeking one new faculty member at the Assistant, Associate or Full Professor level in the University Tenure Line or Non-Tenure Line (Research). Both physicians and non-physicians are encouraged to apply for this research-intensive, full-time faculty position. Competitive start-up funding will be tailored to the needs of the successful applicant. Candidates should exhibit a track record of excellence in research and, at the more senior levels, should have a national and international reputation. At the more junior level, candidates should exhibit the potential to become top national and international caliber researchers. In addition, they should already demonstrate autonomy in developing their own research agenda. Independent grant funding (or, for more junior candidates, the potential to successfully secure regular research funding), publication record, and programmatic synergy with members of SPRC will be considered. SPRC is interested in recruiting an innovative researcher with focus on one or more of the following areas: community and multi-level interventions, community-based participatory research and health behavior interventions, health disparities, socioeconomically disadvantaged and/or underrepresented minority populations, translation of research into policy and public health practice, study of health and the physical and social environments, and innovative methods in community-based research. We expect the successful candidate to actively contribute to the programs and collaborative activities of the SPRC.

Rank will be determined by the qualifications and experience of the successful candidate. The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criterion for appointment for faculty in the Non-tenure Line (Research) is evidence of high-level performance as a researcher and expertise that fulfills a programmatic need.

Interested candidates should send a copy of their curriculum vitae, a brief letter outlining their interests and the names of three references electronically to: Marisha Smith, Faculty Affairs Specialist at marisha.smith@stanford.edu.
