

Stanford Center for Biomedical Informatics Research Department of Medicine

The Stanford Center for Biomedical Informatics Research in the Department of Medicine at Stanford University invites applicants for a faculty position at the rank of Assistant, Associate or Professor in the Medical Center Line. Candidates should have demonstrated expertise in informatics and have completed formal training in biomedical informatics or computer science as well as have board eligibility in Internal Medicine and excellence in clinical care.

The successful candidate will be expected to conduct a vigorous, independent research program, to advise students in a graduate program in Biomedical Informatics, and to assist in program administration. We are particularly interested in candidates who are clinically active, which would allow them to contribute to the mission of one of the clinical divisions in the Department of Medicine. The major criteria for appointment for faculty in the Medical Center Line are excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. The search committee is particularly interested in applicants who will work directly with a clinical division in the Department of Medicine and Stanford's health systems on projects that will offer benefits to patient care.

The successful candidate should have an MD, or MD/PhD and board eligibility in Internal Medicine and will be required to successfully obtain a California Medical License. Faculty rank will be determined by the qualifications and experience of the successful candidate.

Interested candidates should send a copy of their curriculum vitae, a brief letter outlining their interests, and the names of three references (who will not be contacted without prior consent) to:

Nigam H. Shah, MBBS, PhD
Chair, Search Committee and Professor of Medicine
